C O N T E N T S

G16 – MINING AND OIL AND GAS TECHNOLOGIES

1. **A. Han, V. Boiko, V. Korobiichuk, T. Khlevniuk, O. Han, D. Bilobrov** Seismoacoustic diagnostics and environmental impact assessment of mass blasting at the Rokytne Special Quarry 7
2. **A. Zelinskyi, Ya. Femyak, V. Artym, V. Mykhailiuk, I. Artym** Improving the method of sealing threaded casing joints by using anaerobic sealants 23
3. **A. Ihnatov, V. Litvinov, I. Askerov** Some features of the design and application of innovative downhole drilling devices 41
4. **O. Kuzmenko** Control of the stress-strain state of the coal seam rock mass in the transition zone during face operations past a mine working 55
5. **R. Lysenko** Information and computing system for modeling gas hydrate dissociation in coal seams 69
6. **S. Lutsenko, Yu. Hryhoriev, S. Zhukov, S. Kalchuk** Study of the relationship between the mining regime and the productivity of iron ore open pits 85
7. **D. Malashkevych, I. Sheka, D. Lantukh** Analysis of global and national practices of implementing circular economy principles in underground coal mining 94
8. **V. Rastsvietaiev, O. Pashchenko, V. Yavorska, D. Yashyn** Theoretical and applied aspects of forming a deposit control system in trunk pipelines 115
9. **V. Ruskih, A. Cherep, O. Haidai** Spatial optimization of the development workings system based on a three-dimensional geological-mathematical model under the conditions of the mine “Samarska” 129
10. **D. Titov** Technological aspect of forming internal open pits edge embankment by ejection blasting 145
11. **A. Feofanov** Characteristics of the mechanism of sinkhole in coal-bearing regions 157
12. **A. Khorolskyi** Modeling the dynamics of production processes in a longwall face based on the application of colored Petri nets 171
13. **V. Tsopa, S. Cheberyachko, T. Bilko, O. Stolbchenko** Analysis of the effectiveness of questionnaires for assessing psychosocial risks in the workplace of miners 186
14. **O. Yavorska, Ye. Koroviaka, V. Khomenko** Substantiation of a scheme for using metro drainage groundwater for industrial water supply 201

G19 – CONSTRUCTION AND CIVIL ENGINEERING

15. **D. Zeziukov, M. Makhinko** Methodology of field testing and analytical assessment of the residual load-bearing capacity of reinforced concrete structures after fire 217
16. **N. Zuievska, V. Berezdetskyi, D. Darmostuk, R. Semchuk, O. Khalymendyk** Numerical simulation of combined penetration and explosion effects on the two-layer roof of shallow-buried critical infrastructure protective structures 230
17. **D. Nechepurenko, I. Danylenko** Organizational and technological foundations for selecting a method of filling openings in frame civil buildings 246
18. **A. Sudakov, S. Fedoriachenko, M. Kononenko, Ye. Piliuhin, K. Kravchenko** Strength of reinforced block structures for civil infrastructure protection 264

19. **O. Tymchenko, V. Yanko** Geomechanical prerequisites for developing underground critical infrastructure based on the experience of deep mine operation 275
20. **O. Shashenko, V. Shapoval, N. Khoziaikina, K. Zhabchyk** Methodology for assessing geotechnical risks of urban development under wartime impacts and territorial recovery 286

G11 – MECHANICAL ENGINEERING

21. **S. Buriak, V. Medianyk, V. Bondarenko** Evaluation of the interaction between the "mechanized support – rock mass" system to determine optimal advancement rates for the working face 300
22. **Yu. Hrytsiv, M. Beskhmelnitsyn, R. Rachkevych, I. Yatsyniak, O. Hrytsiv** Analysis of technological factors affecting corrosion aggressiveness in gas condensate wells and substantiation of controllable operating parameters 309
23. **O. Dolgov, Y. Slupska, O. Naumenko** Statistical and tribomechanical modeling of loading and wear of austenitic steel medical instruments during root canal preparation 320
24. **K. Ziborov, D. Laukhin, I. Verner, O. Tverdokhlib** Use of generative artificial intelligence in solving technical engineering tasks in design 330
25. **D. Kolosov, S. Onyshchenko, S. Panchenko, O. Linnyk, P. Chernysh, D. Nievierov** Modeling the stress-strain state of a dynamic implant for vertebral stabilization with an intermediate elastic element 340

G2 – ENVIRONMENTAL PROTECTION TECHNOLOGIES

26. **Yu. Voitenko, T.I. Rusakova, O. Zolotko, O. Dolzhenkova, O. Gunko** Assessment of the environmental hazard posed by heavy metal contamination of bottom sediments in the drained Kakhovka Reservoir and justification of remediation measures 351
27. **O. Kovrov, Yu. Ishchenko, A. Bohun, V. Tur, V. Fedotov** Environmental assessment of soil contamination along tram tracks in the Dnipro city using biotesting method 365
28. **P. Lomazov, V. Soroka** A probabilistic model for reconciling circularity and climate performance in steel-slag processing 378
29. **I. Myronova, O. Borysovska, Yu. Kryvoruchkina, A. Rudchenko** Justification for the implementation of a continuous monitoring system for pollutant emissions at industrial facilities with high environmental risk 394
30. **V. Chaika, A. Pavlychenko** Environmental and technological criteria for selecting a zinc and manganese leaching method for spent batteries 407
31. **T. Yakovyshyna, A. Nester** SWOT-analysis of the possibility for achieving sustainable development in galvanic production in Ukraine 418
